

Engineering Change Notice (ECN)

Design Affected: DA14680 wearable daughter board (224-37-C)

Function affected: NFC operation

Symptom: NFC is failing to connect even in contactless mode

Recommended solution:

De-coupling capacitor C134 (1uF) connected at the power supply pin of the NFC module LA66C300 has to be de-assembled for the NFC contactless mode to operate as expected:

Capacitor C134 has to be removed for proper operation of the NFC module
